

Fact Sheet

About Rosy

Designed by former salon and spa owners, Rosy Salon Software is a comprehensive cloud-based suite of scheduling and business tools with features created exclusively for salons and spas. Secure hosted internet cloud technology provides unlimited power and flexibility – in one affordable, easy-to-use salon software application. With Rosy, day-to-day salon and spa operations are automated and easy to use, in turn, client satisfaction, loyalty, and sales increase.

Rosy Salon Software was launched in 2009 and is currently servicing thousands of salons, tens of thousands of hairdressers, and millions of customers throughout the U.S. and Canada.

Rosy's Mission

To provide full-featured salon and spa management Software as a Service (SaaS) to the beauty industry that leverages the latest technology and allows users to build deeper relationships with clients while increasing their revenue and profitability.
